In re)
)
Amendment of Section 73.202(b),) MM Docket No. 92- ____
Table of Allotments, FM Broadcast) RM- ____
Stations)
(Temple, Texas))
)
To: Chief, Mass Media Bureau)

SUPPLEMENT TO PETITION FOR RULEMAKING

Progressive Communications, Inc. ("Progressive"), which is authorized to build and operate a new FM station on Channel 269A in Temple, Texas, hereby supplements the Petition for Rulemaking ("Petition") that it filed on December 24, 1992. In its petition, Progressive sought to amend the Table of Allotments, 47 C.F.R. § 73.202, to substitute Channel 269C3 for Channel 269A at Temple.

On December 22, 1992, the Commission issued a public notice announcing its receipt of an amendment to a pending application for a construction permit to build and operate a new station on Channel 270A in Lometa, Texas.¹ The coordinates for the new site specified in this amendment necessitate a slight change in the reference coordinates proposed by Progressive. This slight modification is described in the supplemental engineering statement attached as Exhibit A. As explained in Exhibit A, use

¹ FCC Public Notice, "Broadcast Applications," Rept. No. 15424, released December 22, 1992 at 5, announcing receipt of amendment to application of Debra L. Witcher, FCC File No. BPH-911107MH.

No. of Copies rec'd

0+4

of these proposed reference coordinates will comply with all distance separation requirements. Operation at Progressive's proposed site will also provide adequate coverage of the entire community of Temple. The proposal is thus in full accord with 47 C.F.R. §§ 73.207, 73.315, and all other pertinent rules and regulations.

Accordingly, because the proposed rulemaking will serve the public interest, Progressive respectfully requests amendment of the FM Table of Allotments to specify substitution of Channel 269C3 for Channel 269A at Temple, Texas and modification of Progressive's authorization to reflect the change in allotment. Upon adoption of the change, Progressive will act promptly to construct the facilities and, once authorized, fully intends to operate on Channel 269C3 in Temple, Texas.

Respectfully submitted,

PROGRESSIVE COMMUNICATIONS, INC.

SUPPLEMENT I
ENGINEERING STATEMENT
FOR
PROGRESSIVE COMMUNICATIONS, INC.
TEMPLE, TEXAS
REQUEST FOR
FM CHANNEL UPGRADE FROM A TO C3

FREQUENCY 101.7 MHZ
CHANNEL 269

JANUARY 1993

Prepared By
William B. Carr & Associates, Inc.
1805 Burleson-Retta Road
Burleson, Texas 76028

SUPPLEMENT I
ENGINEERING STATEMENT OF WILLIAM B. CARR REGARDING
UPGRADE FOR FM CHANNEL 269
FOR
PROGRESSIVE COMMUNICATIONS, INC.
TEMPLE, TEXAS

I, William B. Carr, am an engineer with the firm of William B. Carr and Associates, Inc., Consulting Engineers, with offices located at 1806 Burleson-Retta Road, Burleson, Texas. I am a graduate from The University of Texas with a Bachelor of Science Degree in Electrical Engineering and a Registered Professional Engineer in the State of Texas. My qualifications as an engineer are a matter of record with the Federal Communications Commission. This firm has been retained by Progressive Communications, Inc. of Temple, Texas, with construction permit BPH-820407AF, to prepare a supplement to the engineering portion of their request to upgrade channel 269A to 269C3 for Temple, Texas.

Progressive Communications, Inc. had proposed the following reference coordinates for the upgrade to a Class C3.

Latitude: 31° 15' 00"
Longitude: 97° 25' 00"

Debra L. Witcher filed an engineering amendment BPH-911107MH to relocate the FM facility for Lometa, Texas channel 270A. This amendment caused the proposed reference coordinates of Progressive Communications, Inc. to be short spaced with channel 270A in Lometa, Texas.

A new allocation study is attached to this statement showing that Progressive Communications, Inc. construction permit can be

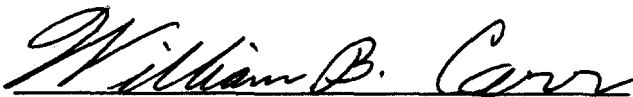

upgraded to a Class C3 facility and meet all the channel spacing requirements. The proposed reference coordinates are to north of Temple, Texas as follows:

Latitude : 31° 16' 24"
Longitude: 97° 23' 33"

A map is attached showing the proposed reference coordinates and the 70 dbu contour relative to the City of Temple, Texas. The proposed upgrade will provide a city grade(70 dbu) signal over the entire city limits of Temple, Texas.

It is our belief that the proposed channel upgrade for Channel 269 from an A to a C3 by Progressive Communications, Inc., is in complete compliance with all Federal Communications Commission Rules and Regulations.

Respectfully submitted,

William B. Carr
Registered Professional Engineer
State of Texas
